Install the USGS ShakeCast V3 Application

Install ShakeCast with easy to use installer for Windows and AWS cloud.

Windows

A native Windows application (Windows 7/Server 2008 and later) with a user interface. This is the main method of installation for most Windows users.

Download (ftp://ftpext.usgs.gov/pub/cr/co/golden/shakecast/ShakeCast_Installer/ShakeCast_V3.14_installer.exe)

[Learn More \(v3_install_shakecast_on_windows.html\)](#)

AWS

Quickly deploy, scale, and manage ShakeCast on AWS. ShakeCast for AWS takes advantage of the underlying infrastructure to allow users to launch and manage their ShakeCast application on demand.

[Learn More \(v3_install_shakecast_on_aws.html\)](#)

Linux

Manually deploy and manage ShakeCast on most Linux platforms. This is applicable for users with dedicated IT resources and security requirements to run the ShakeCast application within organization's own infrastructure.
