ShakeCast V3 pages

The following pages and posts are tagged with

shakecast_v3

Title	Туре	Excerpt
Install ShakeCast on AWS (v3_install_shakecast_on_aws.html)	Page	## ShakeCast Cloud Installation ShakeCast V3 is shipped primarily as a pre-packaged Linux system image. Among tested distributions, CentOS (open-source equivalent of the RedHat Enterprise Linux) is the default operating system (OS). With the ready-to-use ShakeCast V3 system image, users can evaluate the software without excessive IT commitment to determine
Install ShakeCast on Windows (v3_install_shakecast_on_windows.html)	Page	{% include tip.html content="For a better terminal emulator on Windows, use [Git Bash](https://git-for-windows.github.io/). Git Bash gives you Linux-like control on Windows." %} ## ShakeCast MS-Windows Installation A Windows Installer Package of ShakeCast V3 for

Windows allows the administrator download, install, and configure the ShakeCast system. The package requires administrative privileges...

ShakeCast Implementation Recommendation (v3_introduction.html)

Page

Introduction ### Purpose This document presents recommendations for the technology infrastructure and setup requirements for deploying the ShakeCast V3 system at Caltrans. The contents of this report are intended for use by information technology (IT) professionals to serve as a technical reference during the deployment process. The recommendations contained...

System Administration (v3_operator_admin.html)

Page

The ShakeCast administrative interface is platform independent and is designed for an administrator to perform common tasks ranging from management of facili...

User Inventory Format (v3_operator_appenda.html)

Page

Appendix A provides specifications on the format of the data files that must be supplied to customize the system to a user's facility inventory, fragilities and their user and notification information. An example of each file is provided with the V3 ShakeCast distribution in a folder found in the ShakeCast...

XML/JSON Metadata Formats (v3_operator_appendb.html)

Page

Extensible Markup Language (known by the acronym XML) is a widely used and easily implemented method of exchanging data between disparate computer systems. The ShakeCast System receives ShakeMap information in XML from the USGS web server and uses XML to communicate all kinds of information between ShakeCast servers: - Data...

Utility Scripts (v3_operator_appendc.html)

Page

A number of valuable Perl scripts are distributed with ShakeCast. This Appendix documents these utilities. For the most part, these scripts are

		internal to the system and normally users many need only a few of them, but users with complicated databases and needs may benefit at least an awareness of
HAZUS MBT (v3_operator_appendd.html)	Page	Relating HAZUS Structure Types to Seismic Performance
MBT Fragility (v3_operator_appende.html)	Page	HAZUS Model Building Fragility Table
Template Keywords (v3_operator_appendf.html)	Page	ShakeCast Notification Template Keywords
System Configuration (v3_operator_config.html)	Page	## Post-installation System Configuration The ShakeCast AWS VM pre-built ShakeCast system comes with a minimal set of configurations with a default email server and worldwide monitoring for earthquake of magnitude 3.0 or greater. Unlike the AWS VM, a non- cloud installation of ShakeCast does not include information for an email server
Customization (v3_operator_custom.html)	Page	Tags provide another means of navigation for your content. Unlike the table of contents, tags can show the content in a variety of arrangements and groupings
Installation Notes (v3_operator_install.html)	Page	This guide is intended for ShakeCast system managers, operators and IT support staff. This guide is for you if you are installing, operating, or configuring
User Guide (v3_pages.html)	Page	This guide is intended for ShakeCast V3 users. This guide is for you if you are using ShakeCast notifications, facility assessment or inspection reports, or
